

At our Head Office in Sulzbach am Taunus (near Frankfurt am Main) we are looking for an experienced

Software Developer Test Automation (m/f/d)

Your key responsibilities

The focus of your challenging and multifaceted job at DIAMOS is the automation of tests and their execution - for our complex and highly configurable business management standard software. A software designed for the investment industry.

As a qualified test automation expert, you will work closely with various internal units, such as software development, product management, and our service desk. In addition, you will support our implementation projects. Through your intensive testing of our software solutions in the area of investment portfolio and fund management, you will make a significant contribution to the success of DIAMOS as a solution provider.

Your major tasks include the conception, creation, further development and maintenance of test automation scripts as well as their execution – with subsequent evaluation and documentation of the test results. You will maintain and configure the test environment and test data, record any errors in an error management system and check compliance with our quality standards. The continuous increase of the automation level of our test execution is also a central element of your job – along with the setup and further development of the automated test framework.

Your profile

You have acquired good IT knowledge on the basis of a university degree in computer science, business informatics, applied informatics or an IT-oriented qualification, and you have

- a good understanding of test tools (e.g. SoapUI) and methods in the area of test automation
- ideally a certification as ISTQB® Certified Tester (m/f/d) or a comparable certification/qualification
- practical experience in the creation of manual or automated test cases, in test execution and in test reporting
- experience in software development (Java), scripting languages (e.g. Shell, Python) and in working with SQL databases (especially Oracle, PostgreSQL)
- an analytical, systematic as well as structured and independent way of working
- a high level of quality awareness and the ability to work in a team
- distinctive skills in problem analysis
- flexibility, resilience and reliability
- a confident and sovereign appearance as well as a good knowledge of German and English, both written and spoken

Our offer

We offer you a modern, attractive and secure job with career prospects, exciting and multifaceted tasks and projects, flat hierarchies with short decision-making processes as well as plenty of room for the development and unfolding of your personal and professional strengths.

A pleasant working environment in air-conditioned offices equipped with state-of-the-art technology and conveniently located is awaiting you. The orientation phase with your own mentor will give you a smooth start. We support your work-life balance with a flexible working time system, 30 days of vacation, special leave and home office offers. Our services are enhanced by attractive, performance-based compensation and other benefits such as a meal allowance, free underground parking, free drinks and fresh fruit, various employee events, and much more. You can relax during breaks in our modern, fully equipped "get-together kitchen", in our creative room, playing billiards or table soccer, or in the nearby Main-Taunus-Zentrum.

Convince yourself and let's get in touch right away. We look forward to receiving your application, stating your salary expectations and earliest starting date. Please send your application to job@diamos.com.
